PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science student with foundational knowledge in programming, software development, and web technologies. Strong understanding of core Computer Science concepts including Data Structures, OOPS, DBMS, and Operating Systems. Passionate about Full Stack Development, and Artificial Intelligence. Quick learner with strong analytical thinking and problem-solving abilities. Seeking internship opportunities to gain practical exposure, contribute to real-world projects, and enhance technical expertise.

EDUCATION

Degree	Institute	Year	Score
B.Tech – Computer Science	CMR Engineering College	2023–2027	70%
Intermediate (MPC)	Narayana Junior College	2023	85%
SSC	Vijetha High School, Narayankhed	2021	100%

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, Understanding of OOPS concepts
- **Web Development:** JavaScript, React, TypeScript, PostgreSQL, FastAPI Responsive Design Concepts
- **Computer Science Fundamentals:** Data Structures, DBMS Concepts, SQL Basics, Operating Systems Basics
- **Cybersecurity Concepts:** Networking Fundamentals, Information Security Principles, Basic Threat Awareness
- **Tools & Technologies:** Git, GitHub, VS Code, Linux (Basic Commands), MS Office
- **Software Development Skills:** Debugging, Code Optimization (Basic), Version Control, Problem Solving

TECHNICAL PROJECTS

- **LearnIt – Full-Stack Tutor Marketplace:** Developed a full-stack tutor marketplace connecting students with verified tutors for online and offline learning. Implemented secure authentication, real-time chat, booking management, and Razorpay payment integration using React, TypeScript, Supabase, and PostgreSQL.
- **TradeX AI – AI-Powered Financial Intelligence Platform:** Built a responsive financial intelligence platform with interactive market dashboards, watchlists, and data visualization. Developed using Next.js, React, TypeScript, and Tailwind CSS with an AI-ready architecture.
- **FastAPI Product Browser API:** Developed a high-performance REST API using FastAPI and PostgreSQL to serve and filter over 200,000 product records. Implemented cursor-based pagination, category filtering, and interactive Swagger API documentation.

ACADEMIC PROJECTS

- **Basic Python Applications:** Developed small programs such as calculators, number systems, and automation scripts to strengthen programming logic and algorithmic thinking.
- **Personal Portfolio Website:** Created a simple responsive website using HTML, CSS, and JavaScript to showcase projects and technical skills.
- **GENDER PREDICTION USING SOUND:** Artificial intelligence, Gender recognition through voice.
- **Minimal IP Geolocation Tracker:** Built a client-side web application for real-time network
- **Machine Learning-Based Sentiment Analysis in English Literature:** Strong expertise in both low-level systems programming and modern web development

CERTIFICATIONS

- Cisco – Introduction to Cybersecurity
- Cisco – Modern AI
- Salesforce – Agentforce Certification
- Infosys Springboard – Full Stack Development

PERSONAL SKILLS

- Strong Analytical and Logical Thinking
- Quick Learner and Adaptable to New Technologies
- Ability to Work Under Pressure

ACHIEVEMENTS

- Solved 250+ coding problems on LeetCode, HackerRank, and CodeChef.
- Participated in hackathons and coding competitions, demonstrating strong problem-solving and teamwork.

EXTRA-CURRICULAR ACTIVITIES

- Participated in technical workshops and seminars related to AI and cybersecurity.
- Practiced coding regularly to improve problem-solving skills.
